Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Chen (5904015).

Chen shows a raised load bearing floor system having a plurality of spaced apart support pedestals (20), the pedestal having coplanar horizontally disposed top surfaces, a plurality of grates (10) being mounted upon the pedestals such that each grate is supported at each of its corner upon one of the pedestals to establish a raised load bearing sub floor over said terrace, paving blocks (60) mounted in an interlocking relationship upon the grates to establish an upper floor, the area between the pedestals being substantially greater than the surface area of the paving blocks, the blocks being fabricated of a material capable of sustaining heavy traffic without appreciable wear.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (5904015).

Chen shows all the claimed limitations except for the grates being rectangular.

Art Unit: 3637

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Chen's structure to show the grates being rectangular because rectangular, square, triangle etc... are all well-known supporting grate structural shapes.

5. Claims 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (5904015) in view of Faulkner (5363614).

Chen shows all the claimed limitations except for the pedestals being of high density foam, or polystyrene.

Faulkner discloses high density foam polystyrene.

It would have been obvious to one having ordinary skill in the art at the time of the invention modify Chen to show the pedestals being of high density foam, or polystyrene because it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

6. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (5904015) in view of Focht(re 20872).

Chen shows all the claimed limitations except for a geotextile material located between the paving blocks and the grates.

Focht shows a sheet of protective material between the top of the grates and the paving blocks to provide cushion for the floor

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Chen to show a geotextile material located between the paving blocks and the grates because it would provide cushion to the floor as taught by Focht.

Response to Arguments

7. Applicant's arguments with respect to claims 13-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different floor structures.
